LOCATION

Tbilisi, Georgia

Professional profile

IT specialist based in Tbilisi with hands-on experience building and supporting business infrastructure: networks, Wi-Fi, CCTV, POS, 1C, automation, hardware repair and staff support.

At peak load I supported 30+ organizations simultaneously and delivered technology setups for 50+ hotels, around 15 restaurants and 80+ offices. Today I combine on-site technical work with vibe-coding, AI mini-apps, digital content and hardware service.

Open to remote, office and on-site roles where business needs one person who can connect hardware, software, networks, visual content and clear communication.

CORE VALUE

- Turnkey infrastructure for HoReCa, offices and retail
- Networks, Wi-Fi, CCTV, POS, 1C and automation
- Hardware diagnostics and repair: laptops, phones, tablets, PCs
- Websites, landing pages and AI-powered mini-apps
- Client training, documentation, estimates and B2B communication

Key achievements

Hotels turnkey

Network, Wi-Fi, CCTV and basic automation for 50+ hotel properties - ready to operate from day one.

30+ organizations

Simultaneous support for offices, shops and service companies: maintenance, updates, remote access and on-site calls.

Offices & HoReCa

Around 80 offices and 15 restaurants equipped with workstations, POS, networks and video surveillance.

POS, cash registers & 1C

Installation, configuration and ongoing support of cash-register and accounting workflows connected to IT infrastructure.

Service center leadership

Grew from technician to service-center manager and later ran an own service center for diagnostics, repair and support.

Professional path

Now • Tbilisi

IT Specialist / Vibe Coding

Georgia

- › Websites, landing pages and AI-powered mini-apps.
- › Hardware repair for laptops, smartphones, tablets and PCs.
- › Photo/video editing: reels, retouching and social-media content.
- › IT, networks, automation and technical support.
- › Open to vacancies and projects - remote, office and on-site.

Several years

IT Engineer / Turnkey Sites

Abkhazia & region

- › Business digital infrastructure from offices to hotel complexes.
- › Networks, Wi-Fi, CCTV, POS and automation.
- › Simultaneous support for 30+ organizations.
- › Own service center and organization contracts.
- › Staff training and local technical ecosystem development.

2011 onwards

Digital Entrepreneur / Service Center Lead

Abkhazia

- › Remote phone access to video surveillance when it was still uncommon in the region.
- › Banking-sector IT support.
- › Own service center: repair, configuration and support.
- › Contract maintenance for organizations and specialist training.

After relocation

Software Sales Manager

Russia

- › Software sales and implementation for business needs.
- › Corporate and private clients, solution selection and after-sale support.

Student years

From Consultant to Service Center Lead

Computer store, Russia

- › Sales consultant, store manager and service-center employee/lead.
- › Hardware repair for PCs, laptops, smartphones and tablets.
- › Client consultation and team management.

Additional experience • Euro

Hands-on Technical Generalist

Germany and other European countries

- › Broadened skills beyond IT: diagnostics, installation and equipment configuration.
- › Electrical work, lighting and internet networks depending on the project context.
- › This experience is part of growth, while the current focus remains IT and digital solutions.
